

Quantum

Cannulated Compression Screw

INTRODUCTION

Overview

Quantum Cannulated Compression Screw system offers the two kinds(2.2, 3.0) of screw head size to treat variety indication.

Continuous discussion with surgeons and personnel working in the OR and solution-finding efforts thereafter have enabled us to develop the Quantum Cannulated Compression Screw.

With this innovative product, we have been able to fulfill all of our valued customers' demands, ensuring the maximum quality and functionality level of the products we have to offer.

INDICATION

Fixation of fracture, osteotomies, fusions and arthrodeses

All In One Tray

D9Q.01010
Tray Only

INSTRUMENT

I-Handle

C8P.01010

Screw Driver Shaft

Ø2.2 SCREW

D8P.22010

Ø3.0 SCREW

D8P.22020

Drill Guide

Ø2.2 / 3.0 SCREW

D8P.02010

K-Wire

Ø2.2 SCREW (Ø0.8)

D8P.04080

Ø3.0 SCREW (Ø1.1)

D8P.04110

K-Wire Depth Gauge

Ø2.2 SCREW (Ø0.8 K-Wire)

D8P.03090

Ø3.0 SCREW (Ø1.1 K-Wire)

D8P.03120

Drill Bit

Ø2.2 SCREW (Ø1.8 / 115mm)

D8P.31170

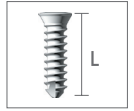

Ø3.0 SCREW (Ø2.1 / 95mm)

D8P.31210

Screws system

- ▶ Two head sizes accommodate patient anatomical condition.
- ▶ Wide range of screw lengths covers variety indication.
- ▶ High precise screw thread from accurate manufacturing process.
- ▶ Screws are made of most biocompatible material of titanium.
- ▶ Star shaped head design secures stable insertion with enough strength.
